-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the word "disclosed" in line 1 should be avoided. Correction is required. See MPEP § 608.01(b).

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-20 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art.
4. Applicant's admitted prior art on pages 2-14 of the Specification, discloses the same digital video recorder capable of playing back a recorded program stream as specified in claims 1-20 of the present invention, the digital video recorder comprising a video processor capable of receiving an incoming program stream and converting said incoming program stream to a baseband signal capable of being displayed on a television associated with the digital video recorder; a storage disk; and a controller that

multiplexes packetized elementary streams into a multiplexed program stream, the packetized elementary streams comprising PES packets of disparate size, the controller operable to (i) receive the PES packets into a memory buffer, (ii) reformat each of the received PES packets into at least one fixed-size program packet having a header and a payload, each header defines at least one of stream type, timing information and picture information, and (iii) associate and store ones of the at least one fixed-size program packets into the multiplexed program stream in the storage disk; and the fixed size of at least one fixed-size program packets is a multiple of a sector size of the storage disk.
